

Protein Bar Production line

Simple solutions for new beginnings

Beha Makina, machinery manufacturing
factory for Protein and Energy bars.

Our machine design and manufacturing center for
delicious and healthy snacks, works to turn the new
ideas and visions of our customers into reality.

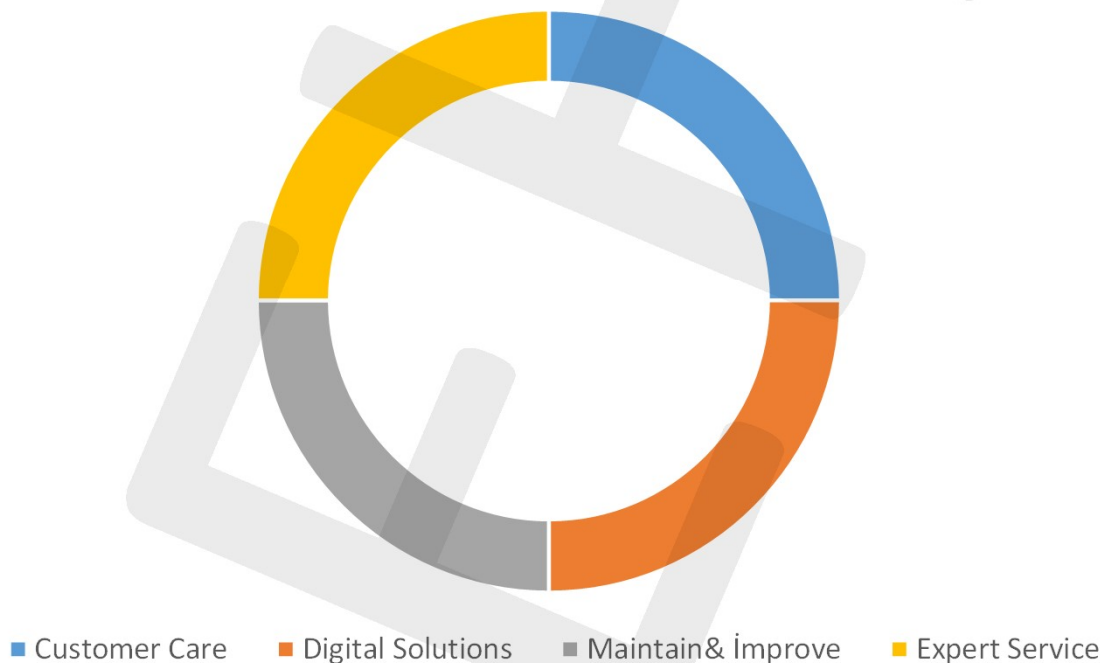

machinery manufacturing factory

We implement machine designs in
accordance with new product
demands and product recipes from
our customers.

We test customer-specific or standard
production lines in our factory together
with our customers, and offer solutions
tailored to their requests.

With our service quality and uninterrupted service policy, you can confidently step into the future.

Beha ensures that you get the best value for your money by producing high quality machines. And so we establish long-lasting partnerships with our valued customers. Our customer service will be in contact with you for all your needs so that you do not experience any disruptions in your production.

With our Smart Machine control systems, wherever you are in the world, we connect to your machine online, so we solve 95% of your problems quickly and without interrupting your production.

While delivering our machines, our expert staff conveys all the details of the machines to your personnel with planned trainings. In your first production, our teams will take part in production with you and continue their training at the time of production.

We produced the full automatic healthy snack bar line for you.

**BEHA
MAKINA**

We offer you our line, including the packaging machine, without the need for any external machine. At the end of the line, your product comes out as packaged, ready for sale.

We produce the most hygienic lines for food production, using completely 304 stainless steel

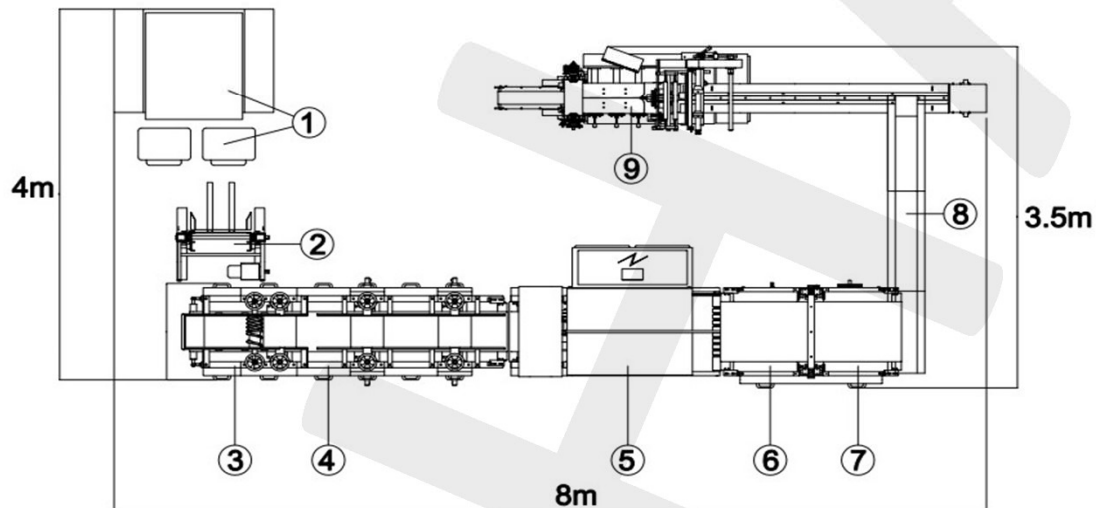

We produce the best and trouble-free machines with the highest quality industrial equipment.
